

Mulch Coverage Chart

How much mulch do I need? Coverage by bed area and depth (1 cubic yard = 27 cubic feet; bag = 2 cubic feet). Calculate your exact amount at homematerialcalc.top/calculators/mulch-calculator/

By area and depth

Area (sq ft)	2 in: cu yd	2 in: bags	3 in: cu yd	3 in: bags
100	0.6	9	0.9	13
200	1.2	17	1.9	25
300	1.9	25	2.8	38
400	2.5	34	3.7	50
500	3.1	42	4.6	63
1000	6.2	84	9.3	125

Bags are standard 2 cubic foot bags, rounded up. A typical bed uses 2-3 inches of mulch; refresh existing mulch at the lower depth. Buying in bulk by the cubic yard is usually cheaper once you need more than about 12 bags.

Your project — fill in and take to the store:

Total bed area (sq ft): _____ Depth: 2 in / 3 in

Cubic yards to order: _____ Or 2 cu-ft bags to buy: _____

Mulch type / supplier: _____
